

ALTRONIC GTI SERVICE NOTE #129

Issued: 09/25/2023

GTI+ RGP Sensor 691223-5

Altronic supplies the RGP pressure transducer and part of the GTI+ Bi-Fuel system. The assembly incorporates an orifice to protect the sensor against pressure spikes.

While there will be no physical change to the assembly as it is applied to the GTI+ system, some other applications in the Altronic product portfolio that currently use this sensor without the orifice will now have the orifice applied. In order to maintain consistency in our overall ERP system, this will force a part number change for the GTI+ application.

As a result, the RGP sensor will no longer be sold under the current part number, 691223-5, and instead will take on the part number 691223-5-ST8. There will be no change to the SAP part number. It will remain 1000-9192-00.

We want to emphasize that this is a change in part number only. The actual sensor assembly, its application, and the price for use in the GTI+ system does not change.

Current stock of the parts with part number 691223-5 will be exhausted prior to shipping the sensors with the new part number marked on the sensor. However, the change to the label on the packaging and to the shipping paperwork will take effect immediately. Please begin the use of this revised part number in all future orders.

If you have any questions about this change, please do not hesitate to contact Altronic.
